

VIRTUOSO.
DISCOVERIES
TRAVEL THAT TRANSCENDS THE ORDINARY

Venture into Space ... Almost. Your Invitation to an Otherworldly Vacation.

Amazing. Exhilarating. Unbelievably Cool.

In 2009, Virgin Galactic and Virtuoso travel specialists will send a fortunate few to an otherworldly destination. These history-making pioneers will experience the exhilaration of weightlessness and the indescribable sensation of viewing our world from an otherworldly perspective.

Virtuoso Discoveries presents an exciting prequel to these sub-orbital flights: zero-gravity flights aboard G-Force One, a specially modified Boeing 727 aircraft that simulates weightlessness. Enjoy an experience described as “amazing” by physicist Stephen Hawking, “exhilarating” by Apollo II astronaut Buzz Aldrin, and “unbelievably cool” by SpaceShipOne aerospace designer Burt Rutan.

**Let me show you the best of this world – and beyond.
